Download Aquarion's app from the App Store or Google Play and simplify your account management today.

Did You Know?

Placing mulch around shrubs and garden plants can help reduce evaporation, keeping soil moist longer and requiring less frequent watering.

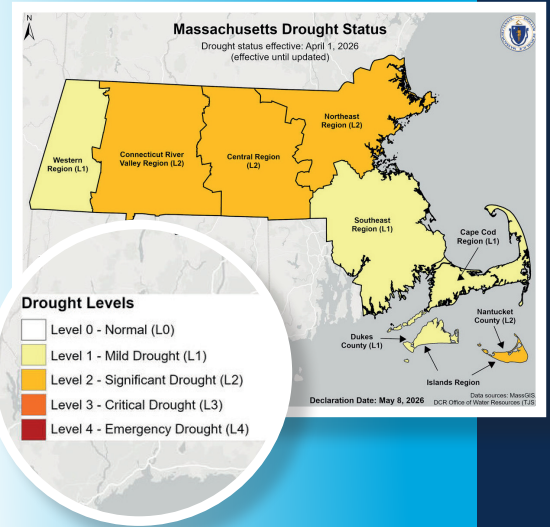

Drought Conditions Worsen In Aquarion Service Areas

As drought conditions intensify across the state, Aquarion urges all customers to comply with the mandatory restrictions in place for their water system. Your cooperation will help ensure a reliable and sustainable drinking water supply throughout the spring and summer months.

Why Focus On Outdoor Watering?

Studies show that more than half of the water used outside is wasted due to overwatering, inefficient practices, or leaky and malfunctioning irrigation systems.

Conditions can change, so be sure to stay up to date on your water system's mandatory restrictions. For additional water-saving tips, visit aquarionwater.com/watering.

Now Available: Your Annual Water Quality Report

Providing our customers with safe, high-quality water is our top priority, and keeping you informed about it is just as important. That's why we encourage you to explore your water system's annual Water Quality Report.

Aquarion's water consistently meets or exceeds all state and federal standards. In the report, you'll find detailed testing results, the sources of your water supply, and the steps we take to ensure its safety and quality.

You'll also discover how we protect our water resources, and simple ways you can help conserve them for the future. Visit aquarionwater.com/wqr to view the latest reports.
