

Abenaki Water Company Water Supply Update

Serving the Communities of Belmont, Bow and Gilford

Weather Trends/Outlook

March rainfall was normal; 2.9 inches compared to an average of 2.9 inches. However, rainfall has been below average every month since June 2025 and Severe Drought conditions persist in the region (see the U.S. Drought Monitor map below).

Coming into spring, there are no water use restrictions currently in place for Abenaki's customers yet residents are encouraged to use water conservatively. Less demand over the winter will help local aquifers recharge thereby lowering the probability of water use restrictions later this spring and summer.
