

Water Supply Update

Serving the Communities of Hampton, North Hampton, & Rye

Weather Trends/Outlook

May was dryer than average. 1.6 inches of precipitation fell on the Seacoast; compared to the monthly average of 4.2 inches. The U.S. Drought Monitor (<https://droughtmonitor.unl.edu>) currently shows moderate drought conditions across the New Hampshire seacoast. While there are currently no water use restrictions in effect, customers are advised to follow best practices for lawn watering, which will reduce the probability of restrictions later this summer.

U.S. Drought Monitor New Hampshire

May 31, 2022
(Released Thursday, Jun. 2, 2022)
