Dear NAME:

I am happy to announce the start of the redevelopment of Well 2, which is intended to increase the water system's production capacity. This project involves cleaning the well and bedrock fractures that feed water into it. The well will be out of service for one to two weeks starting Monday, April 22, 2024.

During this time, our water supply will be limited, coming only from Well 3 and bulk water purchases. To assure that essential household water needs will be met and to minimize the expense of bulk water purchases, we are asking all residents to diligently observe water conservation practices during this period. Please ensure that indoor water uses are not wasteful and do not use the public supply for outside uses.

Your cooperation is greatly appreciated and will help contribute to the long-term resolution of water use restrictions. Progress on this work, along with other system information is available on our website <https://www.aquarionwater.com/abenaki/white-rock-system-update>.

Sincerely,
ABENAKI WATER COMPANY
